**Department of Neurobiology and Behavior**

Tuesday, February 11, 2014

Dear CIBT Alum:

We wish to announce our department's Summer Session courses for 2014. These are listed on the attached poster. **Two of these are presented at the freshman level ("Investigative Biology Lab" and "Comparative Physiology")**. Traditionally, about one-third of our summer enrollment in these courses has been made up of high school students who were looking to get an early start on their college curriculum or who wanted to take the equivalent of an advanced placement course. In our experience, eager high school students perform as well in these courses as do our first-year college students. Both of these courses may be counted towards the Biology Major at Cornell, and are taken by nearly all of our biology students.

**We would be most obliged if you would display this poster in your classroom and school, and bring it to the attention of interested students.** The web address given at the bottom of the poster also lists other summertime biology courses at Cornell. If you have any questions about the courses on this poster, please contact me at: [kka4@cornell.edu](mailto:kka4@cornell.edu). You may also contact Cornell's Summer School office at: [www.sce.cornell.edu/ss/](http://www.sce.cornell.edu/ss/)

Sincerely yours,

A handwritten signature in black ink, appearing to read "Kraig Adler".

Kraig Adler  
Professor of Biology  
*and*  
Former Chairman, Neurobiology & Behavior
